

## ECS User Conference

September 24, 25, 26th

*Montréal, Québec, CANADA*

We are pleased to announce that we will be hosting an ECS User Group Conference on September 24th, 25th and 26th, 2008 in Montréal.

The purpose of this conference is to provide a forum in which both SNC-Lavalin and its customers can benefit from discussing our technology developments and product plans, and sharing information, operational experience and industry issues. The conference is divided into three segments: Presentations, Focus Groups, and a Control Center Excursion.

The presentations will concentrate on our recent experiences and how we are evolving the GENe systems to meet increasing security requirements and expand our Smart Grid functionality. The focus groups will allow for more in depth discussions with our ECS subject matter experts. The excursion will include a visit to a Hydro Québec Transmission Control Center located north of Montreal in the scenic Laurentians.

We are also seeking customers interested in presenting their GENx experience. This would be an opportunity to share ideas of how their GENx has addressed specific issues or interfaces with other applications within their organization. If you would like to speak at the ECS User Conference, please let us know and we will be glad to assist you in the preparation effort of the presentation.

Kind Regards,

*Laurie Holdron*  
*Manager Customer & Project Services*
