Who we are

Founded in 1911, SNC-Lavalin is a global fully integrated professional services and project management company and a major player in the ownership of infrastructure. From offices around the world, SNC-Lavalin's employees are proud to build what matters. Our teams provide comprehensive end-to-end project solutions – including capital investment, consulting, design, engineering, construction, sustaining capital and operations and maintenance – to clients in oil and gas, mining and metallurgy, infrastructure and power. On July 3, 2017, SNC-Lavalin acquired Atkins, one of the world's most respected design, engineering and project management consultancies. snclavalin.com

Discover our sectors

We're focused on four key sectors: Infrastructure, Mining & Metallurgy, Oil & Gas and Power. Across these sectors, we're working to ensure that our people deliver as promised to clients, that our operations are efficient, and our company is ethical and profitable.

Infrastructure

Mining & Metallurgy

Oil & Gas

Power

Services

We are one of very few firms with world-class expertise at scale in financing & asset management, engineering, procurement, construction, training, and operations & maintenance. This is a key differentiator in our industry, and a powerful vehicle for delivering outstanding value to our stakeholders.

Key Projects

Infrastructure

In 2015, the Canadian government chose Signature on the Saint-Lawrence Group to replace this important aging gateway. As the partnership's major equity partner, we'll design, build, finance, operate, maintain and rehabilitate the Champlain Bridge Corridor.

The Ontario government selected Crosslinx Transit Solutions General Partnership to design, build, finance, maintain and rehabilitate the Eglinton Crosstown Light Rail Transit (LRT) line. The project earned a 2015 Gold Award in project financing from the Canadian Council for Public-Private Partnerships.

Mining & Metallurgy

In partnership with Sinopec Engineering Group (SEG), we're delivering one of the world's largest and most advanced sulphuric acid complexes for Saudi Arabian mining and metals leader Ma'aden. The program's trainee employment rate is at 100%.

Roy Hill is the world's largest – ever private, land based mining and infrastructure project. The integrated mine and processing facilities, port and 344-kilometre heavy haulage rail line will ensure that Australia remains the globe's top iron ore exporter.

Oil & Gas

The contracts, awarded to us by Saudi Aramco are part of the national oil company's onshore maintain potential program. We'll install or upgrade well tie-in piping as well as supervisory control and data acquisition (SCADA) and remote terminal units.

We've been involved in four contracts on the INPEX-operated Ichthys Project Onshore LNG facilities since 2012, including two partnerships. We've hosted 45 apprentices to date through client and government-funded programs, our own Electrical Trade Assistants and received accolades for our exemplary commitment to safety.

Power

In January 2016, Ontario Power Generation awarded our joint venture a \$2.75 billion contract for the Darlington nuclear refurbishment project. We will extend the life of the station's four Candu® 935-MW reactors: replacing each reactor's calandria tubes, fuel channels and feeders.

The new John Hart Generating Station facility in Vancouver is Canada's first P3 in the power sector. We are designing a new facility and moving the hydroelectric facilities underground. In 2019, we'll decommission the old facility and maintain the new station for 15 years.
