Who we are

Founded in 1911, SNC-Lavalin is a global fully integrated professional services and project management company and a major player in the ownership of infrastructure. From offices around the world, SNC-Lavalin's employees are proud to build what matters. Our teams provide comprehensive end-to-end project solutions – including capital investment, consulting, design, engineering, construction, sustaining capital and operations and maintenance – to clients across oil and gas, mining and metallurgy, infrastructure, clean power, nuclear and EDPM (engineering design and project management). On July 3, 2017, SNC-Lavalin acquired Atkins, one of the world's most respected design, engineering and project management consultancies, which has been integrated into our sectors.

Discover our sectors

We're focussed on six key sectors; Infrastructure, Mining & Metallurgy, Oil & Gas, Clean Power, Nuclear and Engineering Design & Project Management (EDPM). Across these sectors, we're working to ensure that our people deliver as promised to clients, that our operations are efficient, and our company is ethical and profitable.

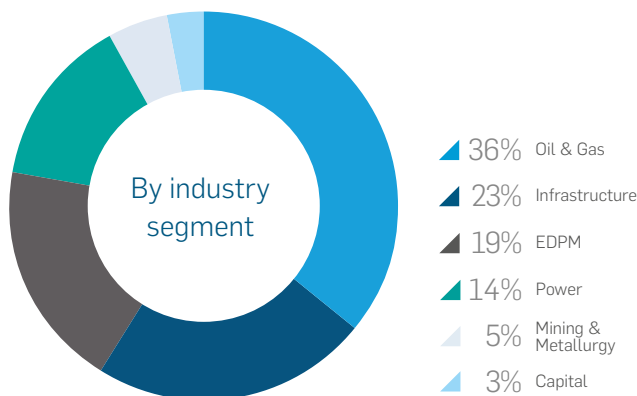

Services

We are one of very few firms with world-class expertise at scale in financing & asset management, consulting & advisory, digital & artificial intelligence, design & engineering, procurement, construction & project management, operations & maintenance and sustaining capital. This is a key differentiator in our industry, and a powerful vehicle for delivering outstanding value to our stakeholders.

\$9.3 BILLION
IN REVENUES

2017 revenues

We set a clear goal to become the global benchmark for ethics and compliance in our industry and a clean-business role model worldwide. Our compliance program consists of three pillars, Prevent, Detect and Respond. This comprehensive system helps ensure all business activity across our Company is carried out in accordance with the highest standards of ethics and compliance.

Our vision and values

Our vision is to be the premier engineering solutions partner, committed to delivering complex projects from vision to reality for a sustainable lifespan.

Our values are the essence of our company's identity. They represent how we act, speak and behave together, and how we engage with our clients and stakeholders.

SAFETY

we put safety at the heart of everything we do, to safeguard people, assets and the environment.

INTEGRITY

we do the right thing, no matter what, and are accountable for our actions.

COLLABORATION

we work together and embrace each other's unique contribution to deliver amazing results for all.

INNOVATION

we redefine engineering by thinking boldly, proudly and differently.

Key Projects

Infrastructure

The Réseau express métropolitain (REM) is an electric and fully automated light rail transit network designed to facilitate mobility across the Greater Montreal Region by linking bus networks, commuter trains, the metro and the Pierre-Elliott Trudeau Airport. Upon completion, REM will be one of the world's largest automated transport networks. With our partners, we'll be providing Engineering, Procurement and Construction for the project, as well as rolling stock, signalling, operation and maintenance services.

Clean Power

We are the preferred contractor for the Stockyard Hill Wind Farm project in Victoria, Australia, set to be the largest wind farm in the Southern Hemisphere. In a joint venture with WBHO Infrastructure Pty Ltd, we are undertaking the engineering design, procurement and construction of all electrical infrastructure on the project in addition to site-wide infrastructure civil works; access roads, hardstands, foundations, public road upgrades, and internal access roads.

Mining & Metallurgy

We are working on the Engineering, Procurement and Construction (EPC) phase of an anhydrous liquid ammonia plant project, in the city of Salalah, Sultanate of Oman for the Salalah Methanol Company, ensuring the successful execution of this project with the utmost care for quality, safety, environment and the community in Salalah.

Nuclear

Our experts are providing management and technical expertise to Argentine nuclear reactor operator Nucleoeléctrica Argentina SA (NA-SA) to guide the company through the life extension of its CANDU reactor, which includes replacing main reactor components and balance of plant (BOP) equipment. This life extension project will provide safe, reliable, affordable and low-carbon energy for up to another thirty years.

Oil & Gas

Our Memorandum of Understanding (MOU) with Saudi Aramco signals our continued commitment to creating and accelerating opportunities for local workforces in the Kingdom of Saudi Arabia. The MOU helps to drive the localization of oilfield services and equipment value chain, to strengthen and diversify the Saudi economy; transfer technologies, skill and knowledge through training and development; and create thousands of new jobs for the growing Saudi population.

EDPM

In Nevada, USA, some 300,000 vehicles use the 3.7-mile Project NEON corridor every day with 25,000 lane changes per hour and 1,400 crashes annually. With traffic predicted to double in the next 20 years, we're designing improvements to boost safety, mobility, and accessibility to meet the needs of the growing resident and tourist populations.
