Corporate fact sheet

Who we are

Founded in 1911, SNC-Lavalin is a global fully integrated professional services and project management company and a major player in the ownership of infrastructure. From offices around the world, SNC-Lavalin’s employees are proud to build what matters. Our teams provide comprehensive end-to-end project solutions – including capital investment, consulting, design, engineering, construction, sustaining capital and operations and maintenance – to clients across oil and gas, mining and metallurgy, infrastructure, clean power, nuclear and EDPM (engineering design and project management). On July 3, 2017, SNC-Lavalin acquired Atkins, one of the world’s most respected design, engineering and project management consultancies, which has been integrated into our sectors.

Discover our sectors

We’re focussed on six key sectors; Infrastructure, Mining & Metallurgy, Oil & Gas, Clean Power, Nuclear and Engineering Design & Project Management (EDPM). Across these sectors, we’re working to ensure that our people deliver as promised to clients, that our operations are efficient, and our company is ethical and profitable.

Services

We are one of very few firms with world-class expertise at scale in financing & asset management, consulting & advisory, digital & artificial intelligence, design & engineering, procurement, construction & project management, operations & maintenance and sustaining capital. This is a key differentiator in our industry, and a powerful vehicle for delivering outstanding value to our stakeholders.

Revenues

For the nine-month period ending September 30, 2018

By Industry segment numbers

- 32% EDPM
- 26% Oil & Gas
- 21% Infrastructure
- 9% Nuclear
- 6% Mining & Metallurgy
- 3% Clean Power
- 2% Capital
- 1% Thermal Power

By geographic area

- 49% Americas
- 23% Middle East & Africa
- 19% Europe
- 9% Asia-Pacific
Ethics & compliance

We set a clear goal to become the global benchmark for ethics and compliance in our industry and a clean-business role model worldwide. Our compliance program consists of three pillars, Prevent, Detect and Respond. This comprehensive system helps ensure all business activity across our Company is carried out in accordance with the highest standards of ethics and compliance.

Our vision and values

Our vision is to be the premier engineering solutions partner, committed to delivering complex projects from vision to reality for a sustainable lifespan. Our values are the essence of our company’s identity. They represent how we act, speak and behave together, and how we engage with our clients and stakeholders.

Key Projects

Infrastructure

The Réseau express métropolitain (REM) is an electric and fully automated light rail transit network designed to facilitate mobility across the Greater Montreal Region by linking bus networks, commuter trains, the metro and the Pierre-Elliot Trudeau Airport. Upon completion, REM will be one of the world’s largest automated transport networks. With our partners, we’ll be providing Engineering, Procurement and Construction for the project, as well as rolling stock, signalling, operation and maintenance services.

Mineral & Metallurgy

For Vale, a global metal and mining corporation, we delivered project management and EPCM services for the retrofit and modernization of its nickel smelter, known as the Clean AER (atmospheric emissions reduction) Project, which is helping reduce the environmental footprint of its operations in Canada. By the time we completed our work in 2018, its Sudbury nickel smelter achieved an 85% decrease in sulphur dioxide emissions and a 40% decrease in dust and metal emissions.

Clean Power

We partnered with ABB to form Linxon, a new joint-venture (JV). Linxon will undertake turnkey electrical alternating current substation projects related to renewable and conventional power generation, power transmission and transportation solutions. Turnkey solutions will include project design, engineering, procurement, construction, management, commissioning and after-sales support. Linxon will have an opening order backlog of USD $340-million (CAD $440-million).

Nuclear

We were awarded the $33 million production tooling contract to support Bruce Power’s fuel channel and feeder replacement (FCFR) project with our joint venture partner Eclipse Automation Inc. Our specialized tools are necessary to support the highly unique work of installing and inspecting calandria tubes and fuel channels used in CANDU® reactors. Manufacturing will take place in Mississauga at our Sheridan Park campus and at Eclipse’s Cambridge manufacturing facility. Delivery will be completed by September 2019.

Oil & Gas

We signed a contract of approximately $240 million (USD180 million) with Kuwait Integrated Petroleum Industries Company (KIPIC) for commissioning management support services, as well as the preparation and delivery of training, documentation and competency development consultancy services, at the country’s Al Zour Refinery. KIPIC is a subsidiary of Kuwait Petroleum Corporation. The Al-Zour refinery will have the biggest refining capacity in the Middle East.

EDPM

We celebrated the opening of the Atkins-designed InterContinental Shanghai Wonderland Hotel, in Shanghai, China, which has been built into the side of a former quarry. The hotel has been designed to reflect the natural landscape of the quarry with a cascading waterfall from the top of the quarry into the pool below, and striking waveform architecture. It has already won several awards.
